

CYNOSURE

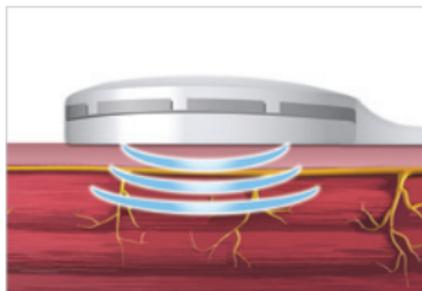

StimSure®

For a sculpted physique

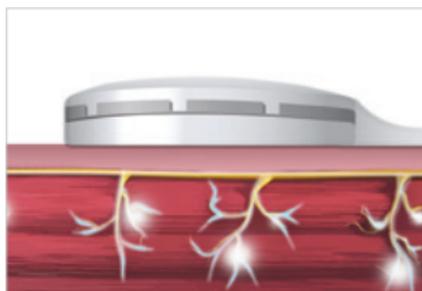

Customised non-invasive treatments to meet your desired goals

HOW DOES STIMSURE WORK?

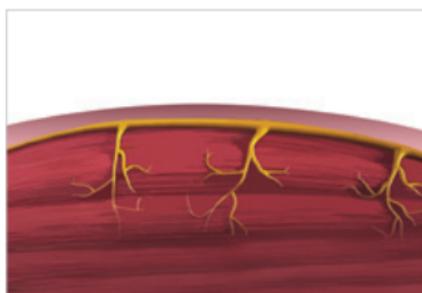

An electromagnetic field from the StimSure paddles, creates an electric current to engage the muscles.

The electric current stimulates an action potential in the motor neuron cells of the bodies muscles.

The muscle contracts like it would during exercise. The stimulation keeps the muscles contracted tense repeatedly – 'maximal tetanic contraction'.

This consistent muscle contraction results in a more efficient growth of muscle fibres.

DEFINE YOUR PHYSIQUE

Discover how to build and tone muscle with our non-invasive, electromagnetic, muscle stimulation treatment.

Treatment Areas

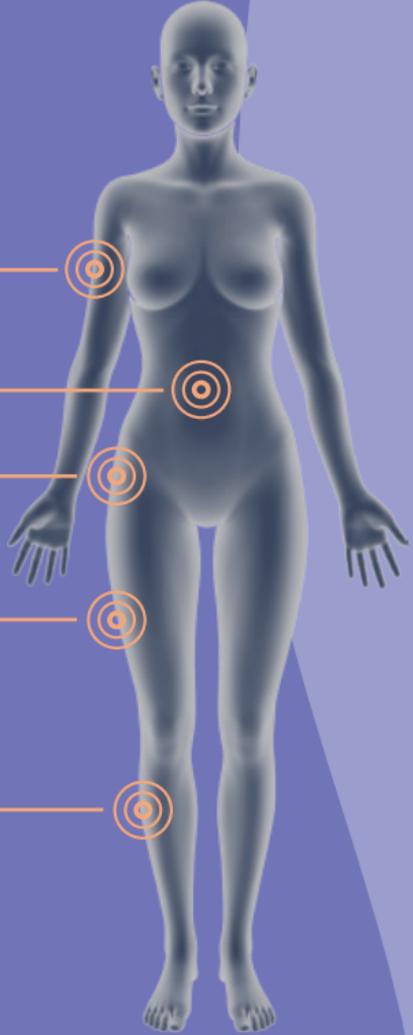

Biceps
Triceps

Abdomen

Buttocks

Thighs

Calves

LOOK GREAT FEEL EVEN GREATER

Life can get in the way of achieving your ideal physique. Now you can fast-track your way to toned abs, defined glutes and most importantly, the self-confidence you've always imagined. StimSure is a non-invasive muscle stimulation technology that builds and defines muscles in a safe, swift and impactful way. You will experience up to 24,000 muscle contractions over a 20-30 minute session to sculpt your physique, with no downtime.

FREQUENTLY ASKED QUESTIONS

Is StimSure right for me?

StimSure is ideal for people looking to build and define their muscles to complement their fitness journey.

How many treatments will I need?

This varies from patient to patient, but it's usually complete within 6-8 sessions. Your practitioner will have a consultation with you before treatment to plan out what you need.

What should I expect during the treatment?

You'll feel your muscles contracting as you would during any physical exercise or movement; StimSure will contract your muscles up to 24,000 times during a 20-30 minute treatment.

How long before I can resume normal activities?

There is no recovery period or downtime with StimSure, so you can have the treatment and get back to your life immediately.

When will I see results?

Patients will start to see and feel results after treatment. However, the best results are usually seen within 3-4 weeks after the full treatment plan.

- ⦿ No surgery
- ⦿ No downtime
- ⦿ Just results

This information is intended for medical professionals and is not intended as a product solicitation or promotion where such activities are prohibited. StimSure is only available in selected countries and is not available in the USA. Because Cynosure materials are distributed through websites and tradeshows, it is not always possible to control where such materials appear. For specific information on what products are available for sale in a particular country, please contact your local Cynosure representative or write to infoaustralia@cynosure.com. StimSure is a non-invasive body contouring system, for a treatment intended for muscular atrophy, with recommended application to strengthen and tighten the abdominal, gluteal and thigh muscles. StimSure is an electrically operated medical device generating an electromagnetic field and is able to contract/stimulate the muscles. Individual results may vary and are not guaranteed. Treatments are not intended for weight-loss or for people who are obese. There are no reports of significant side effects. The post treatment effects that may be experienced include, but are not limited to: Muscular pain, temporary muscle spasm, temporary joint or tendon pain, local erythema or skin redness, premature menstruation and/or lower abdominal cramps. Models for illustrative purposes only and not an actual consumer of the product.
